Daily Trains Affected

Along Indiana Harbor Belt (IHB) rail line between 123rd Street and the Cal Sag Channel

Alsip and Blue Island, IL

77 Freight Trains (IHB, CSX, UP, BNSF, CN, NS, CP, Iowa Interstate)

Scope of Work

Construction of a third main line along the Indiana Harbor Belt. Upgrading of some existing track at interlockings, where two tracks cross. Includes a new rail bridge over 127th Street and associated signal work.

Benefits

Prior to completion of this project freight trains destined to Barr and Blue Island Yards to the east waited at this location for access to the yards, creating congestion on the main line tracks. The new third main line track now provides additional capacity for trains passing through the area to proceed around trains waiting for yard access.

Communities Benefited:

- Alsip and Blue Island, IL

New rail bridge over 127th Street

New Third Mainline
